DATA SPACES SUPPORT CENTRE

[Source: EC, DG Connect]

[Source: EC, DG Connect]

Our mission

Enable data spaces to reach a higher flight level faster: a quick start and an accelerated scale-up.

Provide the tools to address the basic organizational and technical matters, required by every data space. This includes a blueprint, best practices, common standards and reference implementations.

Enable dataspace to focus on their domain-specific business challenges and provide business benefits to their participants.

Data Space Interoperability

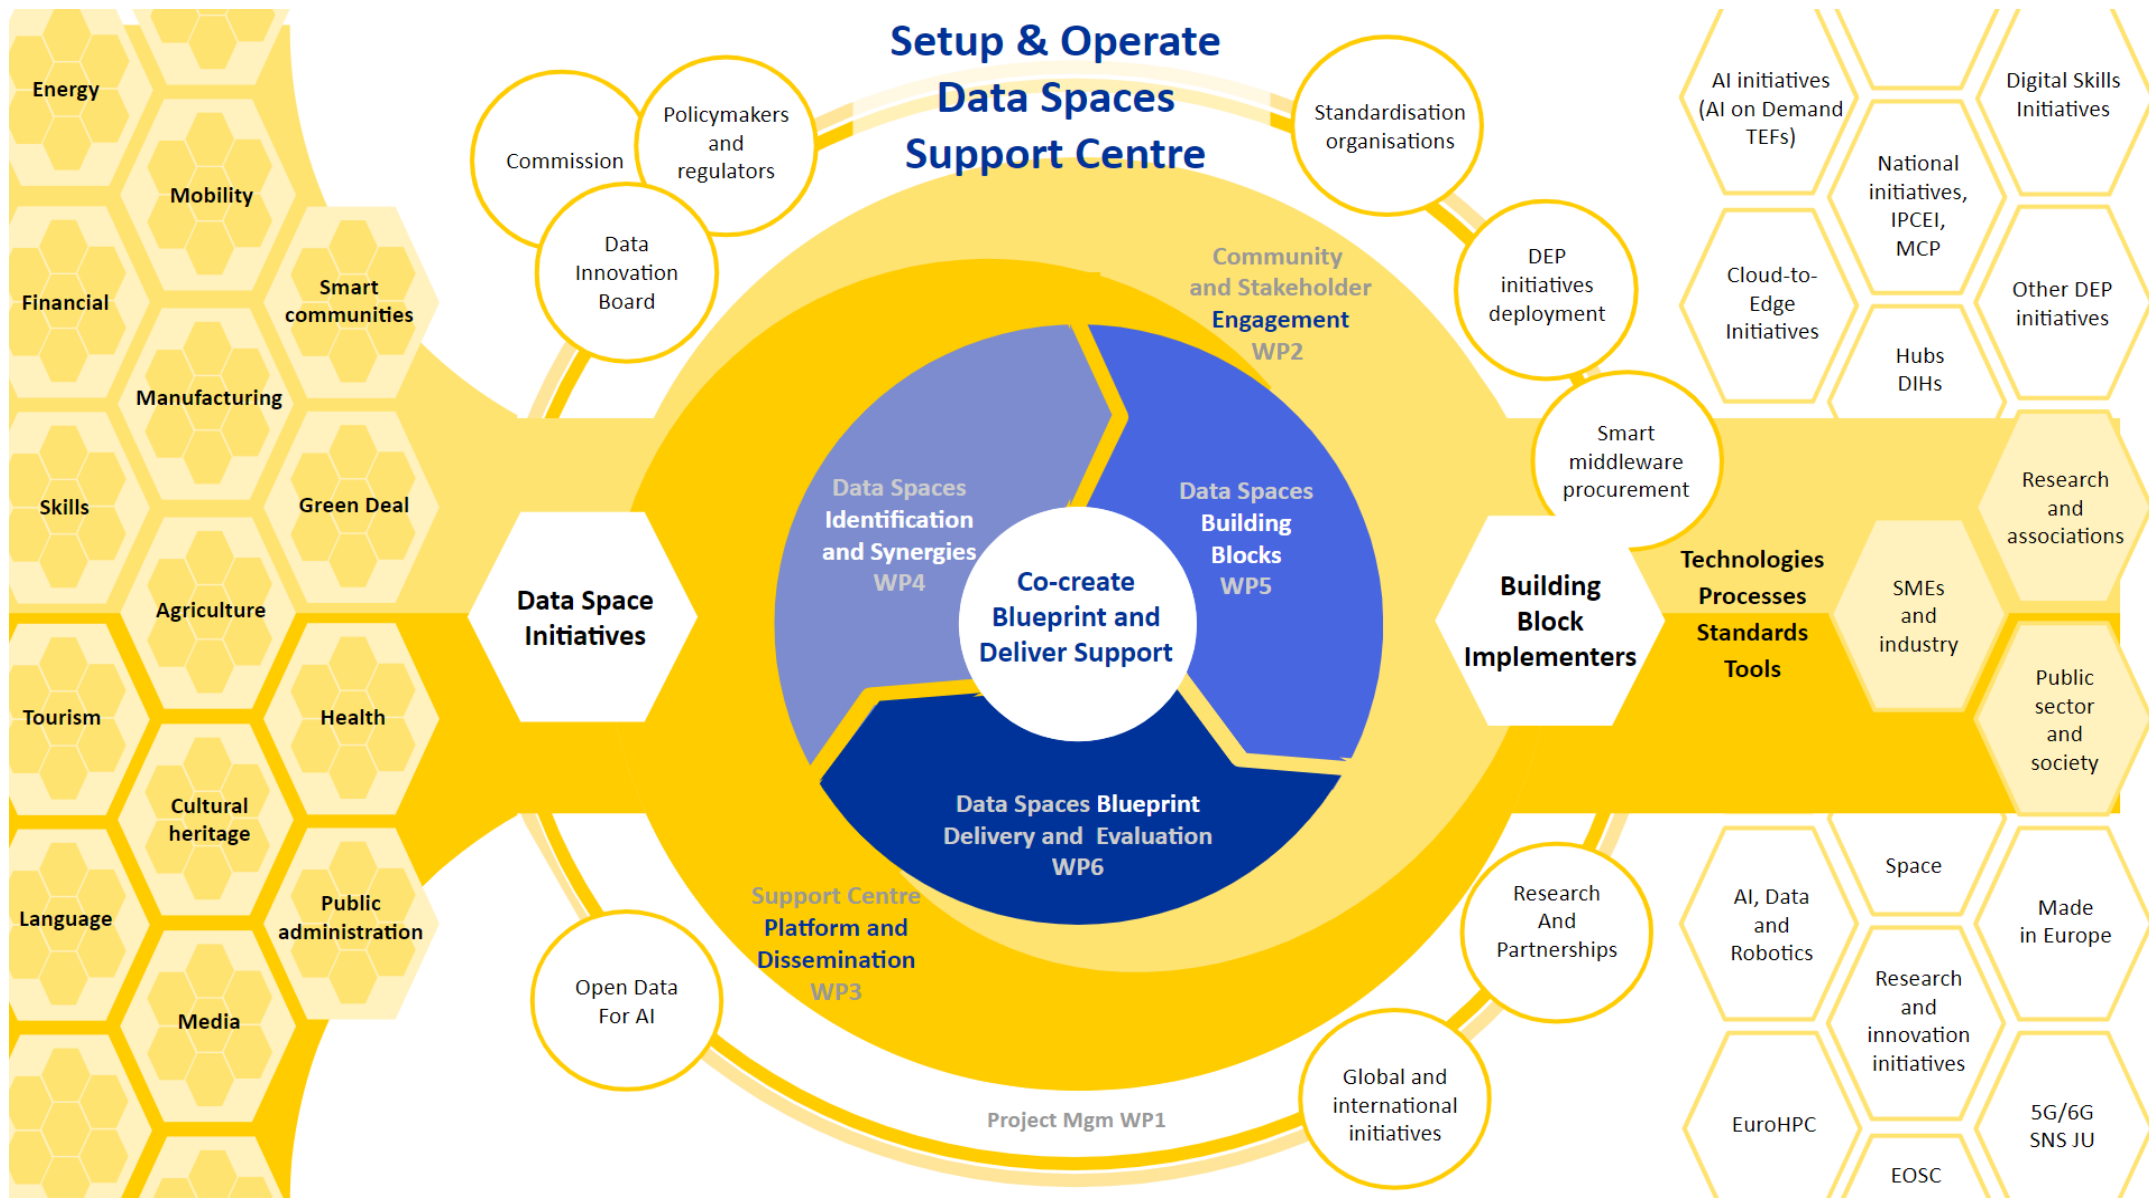

Ensure that participants of one data space can also participate in other European data spaces.

Create economies of scale and synergies on a European level.

Can only be achieved if every data space conforms to certain standards, which will be part of our blueprint.

A pan-European consortium

- Let us know if you have standards or technologies for our blueprint!
- We're ready to help data spaces!
